Key Attributes

- ✧ **Shariah Compliance** - The Iman Fund adheres to credible Islamic principles. Islamic investing principles generally preclude investments in certain industries (e.g., alcohol, pornography and casinos) and investments in interest bearing debt obligations or businesses that derive a substantial amount of interest income. Choosing stocks that fit Islamic investing (Shariah Compliant) criteria is a thoughtful, analytical, and continuous process. For example, companies generally have a percentage of income that accrues due to interest and other "impure" income from business activities contrary to the core values of Islam.
- ✧ **Actively Managed Portfolio** - The Iman Fund's actively managed portfolio should enable the Fund to take advantage of future opportunities in the market while staying true to Islamic principles. Among the securities that meet Islamic principles, the investment advisor will determine a security's attractiveness for purchase based on a number of factors, including its anticipated value and record of earnings growth, among other things.
